ADITHI CHITTUPOLU

+91 8121288651 | Hyderabad, India | adithichittupolu@gmail.com | Linkedin

SUMMARY

Big Data Analyst with experience in **data analysis, aggregation, and transformation** using **Apache Spark** and **Hadoop (HDFS)**. Proficient in **ETL pipeline development, MySQL,** and **PostgreSQL** for structured data analysis. Skilled in building interactive **Power BI dashboards** for reporting and insights. Strong understanding of **distributed data processing, data quality,** and **analytical workflows**, with the ability to collaborate effectively in **agile team environments**.

EDUCATION

- **Bhoj Reddy Engineering College for Women, Hyderabad** *2020 - 2024*
  Bachelor of Engineering in Information Technology **CGPA: 7.74**
- **Narayana Junior College, Hyderabad** *2018 - 2020*
  Intermediate **Grade: 94.3%**

SKILLS

- **Programming Languages & Databases:** Java, JavaScript, Scala, HTML, Python (basic), MySQL, PostgreSQL
- **Big Data & Data Engineering:** Apache Spark (Scala,RDDs, Data Frames, Datasets), ETL Pipelines, Hadoop (HDFS), Data Aggregation & Transformations
- **Visualization & Reporting:** Power BI (dashboards, reporting, analytics)

EXPERIENCE

- **Capgemini** *July 2025 - September 2025*
  BIG DATA WITH SCALA Bangalore, India
  - Completed training in **Distributed Apache Spark** and **ETL pipeline development** with Scala, gaining hands-on experience in **data aggregation, transformation, and optimization** using Spark (RDDs, DataFrames, Datasets).
  - Worked with **HDFS, Hadoop ecosystem tools, and PostgreSQL** for distributed data storage, processing, and relational data management.
  - Created **Power BI dashboards** for data visualization and reporting, integrating insights from end-to-end ETL pipelines.
  - Presented project implementations during training sessions, demonstrating strong communication skills and technical clarity.

  December 2025 - Present
  Client: Mercedes-Benz Research & Development India (MBRDI) Bangalore, India
  - Supporting **MIAS (Market Intelligence & After Sales) operations** by handling **after-sales market data** across multiple regions
  - Working with **AWS-based data sources** and **SQL queries** to extract, validate, and analyze operational and market datasets.
  - Managing and maintaining **Excel-based reports and trackers** to monitor data accuracy, performance metrics, and market follow-ups.
  - Assisting in **data pipelines** for processing and updating after-sales and market-related data.
  - Performing **data validation, reconciliation, and basic transformations** to ensure data quality and consistency.
  - Coordinating and **following up with global markets** to resolve data gaps, discrepancies, and reporting issues.

PROJECTS

- **Education Analytics ETL Pipeline**
  Tech Stack: *Scala, Apache Spark, PostgreSQL, Power BI, CSV*
  - Built an **ETL pipeline** using Scala and Apache Spark to process student exam results, attendance, and learning activity data; extracted and transformed raw data by cleaning missing values, normalizing IDs, calculating averages, and adding **grade classification and attendance metrics** for dropout risk analysis.
  - Loaded the curated data into **PostgreSQL** for advanced querying and designed **Power BI dashboards** to visualize trends and provide actionable insights for users.
- **Stock Price Prediction Model Using Sentiment Analysis**
  Tech Stack: *Python 3, Machine Learning, NLP, APIs, Data Preprocessing, Data Visualization*
  - Integrated **financial news sentiment analysis** with **historical stock price data** to improve prediction accuracy.
  - Collected stock market and news data using **APIs**.
  - Performed **data cleaning, text preprocessing, and feature engineering** for sentiment analysis.
  - Built **machine learning models** to predict stock price movements.
  - Evaluated model performance using **accuracy, precision, and recall**.
  - Visualized trends and results using **data visualization techniques.**
