Strengths

Full Stack Developer

- Hands-on experience developing web applications using **ASP.NET Core Web API, Entity Framework Core, ASP.NET Core Identity, JWT authentication, and SQL Server** following the **Repository pattern**
- Skilled in building **Single Page Applications (SPA)** with **Angular**, including **JWT-based authentication, Reactive Forms, Angular routing, and TypeScript**.
- Proven experience in delivering end-to-end **full-stack solutions** using **C# .NET Core** for backend and **Angular** for frontend Experience in API documentation using **Swagger**, data validation with **Data Annotations**, and implementing **role-based authorization**.
- Strong background in designing and developing **RESTful APIs** with complete **CRUD functionality** and **service-layer architecture**.
- Solid understanding of **ASP.NET Core** application deployment, including **CORS configuration** and **Entity Framework Core migrations**

Achievement

E-Commerce Shopping Cart Application

Completed an end-to-end **Electronics Marketplace** case study application using **ASP.NET Core Web API, Entity Framework Core, and SQL Server**, featuring **JWT-based authentication, Swagger API documentation**, and an integrated **wallet payment system**, with a **responsive UI built using Angular and CSS** for the user interface.

Code Conversion From .Net to Java Spring Boot Using LLM

Developed a system that converts an entire **.NET Core Web API project** into a fully functional **Java Spring Boot application** using an **LLM**, by uploading a single ZIP file. The solution performs complete project transformation in one step, automatically generating the appropriate **Spring Boot project structure, source code, and configuration files**. It also features **user authentication, registration, and per-user conversion history tracking**.

Certifications

Microsoft Certified: Azure Fundamentals (AZ900)

Microsoft Certified: Azure AI Fundamentals(AI900)

REST APIs with Flask and Python course at Udemy

Education and certificates

Bachelor of Engineering

Electronics and Communication : 2021 - 2025

Skills

C# / .NET Core	C# Fundamentals, OOPS Concepts, Generics, Collections, Arrays, Loops, LINQ Expressions, Lambda Functions, Nunit Testing, ASP.NET Core MVC
ASP.NET Core Framework	Dependency Injection Container, IOC Pattern, Service Registration & Lifetime Management
ASP.NET Core Web API	3-Layer Architecture, RESTful Controllers, HTTP Methods (GET, POST, PUT, DELETE), Data Annotations Validation & Global Exception Handling, Controllers & Repository layers
Entity Framework Core	Code-First Approach, Database Migrations, Repository Pattern Implementation, Database Context Management, Transaction Handling
ASP.NET Core Identity & Security	JWT Token Authentication, Role-based Authorization, Identity framework
Angular Framework	Component Architecture, Injectable Services, Feature Modules, Angular Routing, Reactive Forms with Validation, HTTP Client & Interceptors
Database	SQL Server Database, Entity Framework Core ORM Integration, SSMS
Frontend	HTML5 , CSS3, TypeScript, Angular CLI, Responsive Design Patterns, Single Page Application (SPA)
Generative AI Tools	Large Language Models(LLMs), RAG, Langchain
Add On skills	Communications, Team management. Agile Methodology, Problem-solving, Code optimization, Documentation, LLM
