

Chittupolu Adithi

Software Engineer

Ph.No: 8121288651

Email : Adithi.chittupolu@
capgemini.com

City : Bangalore

Profile Summary

- Completed hands-on Big Data training at Capgemini with experience in distributed systems and large-scale data processing.
- Worked on data migration projects involving ETL development and movement of large datasets across distributed environments.
- Built ETL pipelines and automated data validation using Spark, PySpark, and SQL for schema checks, record reconciliation, and data quality verification.
- Focused on creating reliable, scalable data migration frameworks and strengthening expertise in data engineering technologies.

Recent Assignments

Education Analytics ETL Pipeline

- Developed an **ETL pipeline** using **Scala and Apache Spark** to process student exam results, attendance records, and learning activity data.
- Extracted raw data from **CSV files**, performed data cleaning (handling missing values, normalizing student IDs), and calculated average performance metrics.
- Implemented **grade classification** (A/B/C/D/F) and attendance-based metrics to support **dropout risk analysis**.
- Loaded the curated dataset into a **PostgreSQL database** for structured storage and advanced querying.
- Designed interactive **Power BI dashboards** to visualize performance trends and provide actionable insights for stakeholders.

Education and certificates

Education :

B.Tech - Information Technology.

Bhoj Reddy Engineering College
For Women **(2024)**

Tools and Technologies:

SQL
Spark
Pyspark
Power BI
Java
Postgresql

Certifications :

1. Database SQL Foundation - OCEAN
2. Scripting Python Foundation - OCEAN
